🏠 Klang, Selangor

## PROFILE

I'm a final-year computer science student with a solid foundation in programming languages including Java, HTML, Javascript, and more. I've also used tools like Microsoft Office, FlutterFlow, MySQL, VS Code, and more. I'm a diligent worker who can multitask. In addition to helping the team, my goals are to obtain real-world experience in a work environment.

## ACADEMIC PROJECTS

SEMESTER 1	SEMESTER 2	SEMESTER 3	SEMESTER 4
Simple Car Rental System using C++.	Restaurant Management System using Java.	Database for Nasi Kerabu Kak Nab stall using MySQL.	Food Ordering System using HTML/CSS & PHP. Delivery App using FlutterFlow.

## WORK EXPERIENCE

- **2023 - PRESENT**  
**AD Project**  
Multipurpose services  
[linktr.ee/adprojects](https://linktr.ee/adprojects) or  
[adprojectmy.com](https://adprojectmy.com)  
AD Project is a daily service web portal that I developed. It offers services such as delivery, transportation, advertising and rental, which are specifically designed to help and meet the needs of students at UiTM Tapah. In addition, this service has been used by more than 300 students.
- **2020 - 2021**  
**Smartlink Engineering**  
Cable Harness  
Learn to solder correctly, secure cables using crimping, connect wires with connectors, check the quality, and quickly manage many different cables while working with others.

## EDUCATION

- **Diploma in Computer Science**
